About us

The European Documentation Centre (EDC) is an EU library, archive and information centre in one. As a point of contact, research and advice for science, the region and the general public, it provides documents, publications and other resources on the European Union (EU).

The EDC is based on a cooperation agreement with the European Union (EU) and is well connected: it works closely with the European institutions, EU-related specialist networks and advice centres at all levels (regional, national & international).

Our services at a glance

» The EDC researches, advises and informs you on all EU-related topics (e.g. European legislation, political measures or EU funding and grants).

» We answer your questions on EU issues and help you with enquiries ranging from straightforward document searches to in-depth research on European topics, either online or print.

» Our centre compiles relevant documents, publications and sources of information for you and arranges further contacts to regional, national and international organisations with an EU connection.

» In addition, we provide a wide range of EU literature, media and resources.
